

Optimize Consulting AI

Turn AI Into an Operational Advantage

Jonathan Keret, Founder | Web optimizeconsulting.ai | Email JKeret@optimizeconsulting.ai

We automate workflows, optimize systems, and integrate the tools you already run on. Enterprise-grade AI for mid-market and growing businesses nationwide, without the enterprise price tag. You don't need to spend millions like the Fortune 500. You need the right processes automated and the right systems connected. We find the work eating your team's time, automate it, and wire it into the software you already live in.

What We Do

Workflow Automation

- Process and intake automation
- Document processing and extraction
- AI customer communications
- Approval and routing workflows

Systems Optimization

- Operations assessment and redesign
- Legacy and spreadsheet modernization
- Real-time reporting and dashboards
- Errors eliminated, hours saved

Integrations

- CRM and ERP integrations
- Industry systems (AMS, LOS, TMS, EHR, POS)
- APIs and data pipelines
- AI inside the tools you use

Who We Help

We work with growing businesses across industries: healthcare and medical suppliers, retail and grocery, professional services, insurance and lending, restaurants and hospitality, and recruiting and staffing. The common thread is not the industry, it is the symptom: work is being retyped between systems, run out of spreadsheets, or lost in manual follow-up. If your team is doing by hand what software should be doing, we can help.

What We've Built

- **Medical equipment biller (DME).** Replaced a 25-year-old billing spreadsheet with an automated tool that reads insurance remittances and posts payments line by line, then designed the full secure web platform to retire the spreadsheet entirely. **Improved:** eliminated hours of manual re-typing, cut posting errors, and moved a one-person-at-a-time file to a multi-user, compliant system.
- **Driver-recruiting agency.** Building a custom platform that runs one candidate across multiple client pipelines in one place, replacing scattered spreadsheets and manual tracking. **Improved:** one source of truth, faster placements, no double entry.
- **Independent grocers and liquor stores.** Built a tool that lets small retailers create a professional weekly digital flyer in minutes and push it to their website and social. **Improved:** gave independents the same weekly-circular reach the national chains have, without an agency or a designer.

How It Works

1 · ASSESS

Free 30-minute call, then we map your operations and find the highest-ROI opportunities. Honest answer on whether AI helps.

2 · PILOT

We automate one high-impact workflow first. AI earns trust by improving real work.

3 · BUILD

We build the full solution, integrate it, train your team, and go live.

4 · SCALE

We expand what works across teams and systems, with monthly impact check-ins.

Why Uptimize

We speak both languages. Enterprise infrastructure and cybersecurity background, Fortune 500 expertise delivered to your business.

We build, not just advise. Most consultants hand you a PDF and wish you luck. We build the actual tools, and if it does not work, we fix it.

We start small. No six-figure contract required. Most engagements begin with a \$1,000 starter project: one painful process automated in about two weeks. We prove the value first, then grow from there.

Senior-led, nationwide. Working with clients coast to coast, from Chicagoland to Southern California.

Ready to see what AI can do for your business?

Book a free 30-minute discovery call. No pitch, no pressure, just an honest conversation.
